## Design and Analysis of Algorithm.

## Jutorial - 1

aus: 1. What do you understand by Aaympto tic notations. Define different Aaymptotic notation with enamples.

Ans: 1. A symptotic notations are those notations that describing the limiting behaviour of a function there are there different types of notations:

- Big Oh (0).

- Big (12).

→ Big (0).

- Big on co).

thing-on (0) notation gives an upper bond for a function f(n) to within a constant factor.

f(n) = Olg(n).

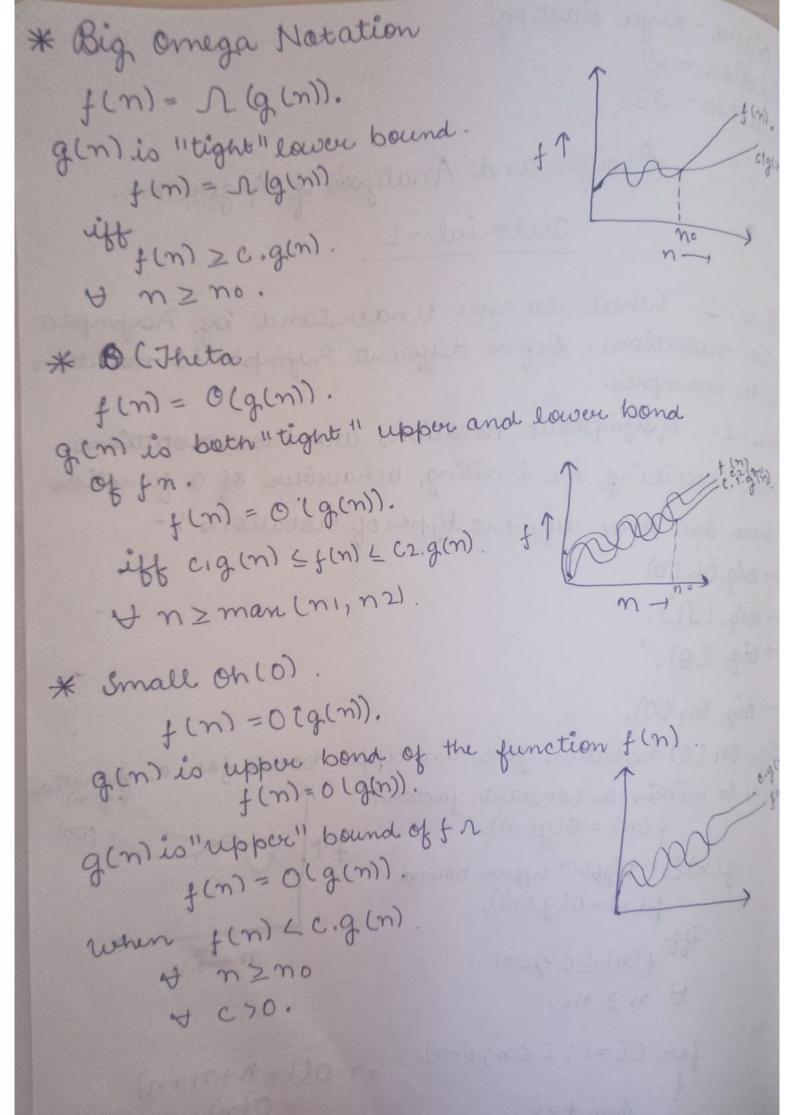

g(n) is "tight" upper bound f(n) = O(g(n)).

ift fin < c.gin) V n ≥ no.

ex:- for (i=1; i < n; i++).

{ Sum = i

$$= 70(1+n+n+n)$$
  
=  $0(n)$ .

\* Small omega (w) fin) = wigin). gent is' dower' bound of fr f(n) = wg(n)). when ten) > c.g(n). y nyno 4 4 C>0 aus: 2 What should be time complexity for (i=1 ton) {i=i\*23. for (i=1 to n) 11 i=1,2,4,8di=i\*27 /1 0(1). => { 1+2+4+0+---+n. Kth toum of GP=> TR = a gr. 1. n= 2x-1 n = 2K 2n = 2K
